

L2 Network Redundancy

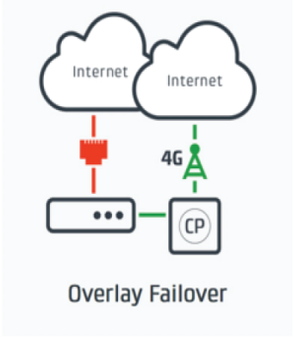

Is your network truly redundant?

It can be!

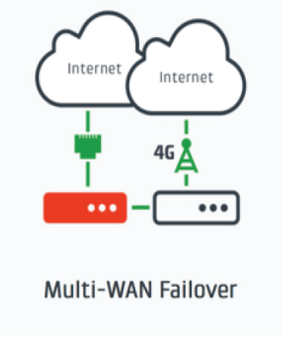

Advanced technologies engineered to help you solve the toughest challenges in primary or back-up networking, security, routing, wifi and remote access.

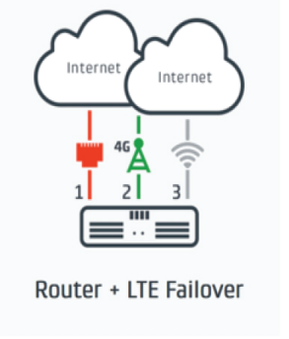

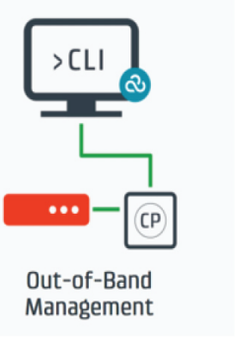

Overlay Failover

Multi-WAN Failover

Router + LTE Failover

Out-of-Band Management

Leverage the knowledge of Layer2 and its partners to help you define your network and security road map, and understand the impact of the various technology options. We can work with your team to develop your network and security strategy and the plans to achieve your vision.
