Layer2 Communications

Layer2 Communications, Inc. is an **Internet Solutions Provider (ISP)** and **Global Technology Aggregator** specializing in data, internet, voice and hardware solutions.

We collaborate with over 155 suppliers in more than 83 countries around the world to deliver private network solutions to help multi-location companies communicate with ease.

Who are we?

- We collaborate with suppliers to deliver solutions best suited for our customer needs
- We spend time on needs assessment to ensure our deliverable is the right solution
- We don't offer solutions unless we are sure it's the best fit

Why Layer2?

We value a relationship built on trust and promoting the right solutions, not a quick sale. Most of all, our experience, our partners and custom solutions make us a valuable resource from a fiscal and technological perspective.
