

L2C Managed Services

Does your Managed Services provider deliver accurate inventory reports, network drawings and quarterly performance statistics per device?

Why not?

With Layer2 Managed Services, we become an extension of your IT staff. We deliver a customized support solution that includes 24 hours a day, 365 uptime and productivity.

Advanced Trouble Ticketing services for proactive support

Managed Network Services Benefits

+ Simplified management. One managed network provider, for both your local and global needs.
+ Lower costs, higher productivity. Minimize hardware expenses and staffing needs.
+ Grow your business. Our experts collaborate with you to evolve your network and take your business where it needs to go.
+ Bundle with Juniper Security services. Let our experts help keep your data and network secure.
+ Full management. Turnkey service includes design, procurement, installation, configuration, management and monitoring.
+ Physical management. We provide break-fix on-site support, while you maintain monitoring and management through your operations team.
+ Professional services. Network audits, migration planning, project management and more.
